

Project Initialization and Planning Phase

Date	03 July 2026
Team ID	N/A
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer deciding what crop to grow this season.	Choose the crop best suited to my soil and climate.	I can't reliably judge suitability from N, P, K, temperature, humidity, pH, and rainfall on my own.	Crop-environment relationships are complex and vary season to season.	Anxious about picking the wrong crop and losing income.
PS-2	An agricultural researcher studying regional crop patterns.	Give farmers consistent, evidence-based crop recommendations at scale.	Manually analyzing soil and climate data for every farm/region doesn't scale.	There's no automated system linking environmental data directly to crop suitability.	Optimistic that a data-driven tool could close this gap.
