Customer Journey Map

Mapping a farmer's experience using OptiCrop stage-by-stage — from discovering the tool, through getting a crop recommendation, to applying it in the field.

Phase of Journey	Stage 1: Discover & Access	Stage 2: Get a Recommendation	Stage 3: Apply in the Field
Actions <i>What does the customer do?</i>	- Hears about OptiCrop from an agri-extension officer or online - Opens the OptiCrop website - Browses the Home and About pages	- Enters N, P, K, temperature, humidity, pH, and rainfall values - Clicks "Predict Crop" - Reviews the recommended crop	- Cross-checks the recommendation with local knowledge - Selects seeds/inputs for the recommended crop - Plants and monitors the crop through the season
Touchpoint <i>What part of the service do they interact with?</i>	- OptiCrop website homepage - About page - Word-of-mouth / extension officer referral	- Find Your Crop input form - Flask backend + trained ML model - Prediction result display	- Local seed supplier / agri store - Field / farm (Future) SMS or notification follow-up
Customer Thought <i>What is the customer thinking?</i>	"Can this really help me pick a better crop?" "Is this easy enough for me to use?" "What information do I need to enter?"	"I hope I entered the values correctly." "This matches what I expected — or does it?" "How reliable is this recommendation?"	"Let's see if this crop performs better this season." "I should compare this with last season's yield." "I'd recommend this tool to other farmers."
Customer Feeling <i>What is the customer feeling?</i>	Curious, slightly skeptical	Hopeful and reassured	Confident and satisfied
Process Ownership <i>Who is in the lead on this?</i>	Frontend / Product team (OptiCrop web app)	ML & Backend team (model + Flask app)	Farmer, supported by agricultural extension services

Phase of Journey	Stage 1: Discover & Access	Stage 2: Get a Recommendation	Stage 3: Apply in the Field
Opportunities <i>How can we improve this stage?</i>	• Add multi-language support • Add a short demo video • Simplify navigation for first-time visitors	• Add input hints/tooltips for each field • Show a confidence score with the prediction • Support simplified/voice entry for low-literacy users	• Add a yield feedback loop after harvest • SMS-based follow-up reminders • Integrate with local agri-input suppliers
